

“Tournament” rules for 3 or more players

GOAL OF THE GAME

Win the tournament by being the first person to score 5 points!

PREPARATION

Get ready for combat by placing one Power Tattoo® of different colors on the inside of each forearm.

The players taking part in the tournament form a circle.

Players agree on the 'leader' (youngest player, player who suggested the tournament etc.). The leader names the person to his left or right as his opponent in the first assault.

HOW TO PLAY

The attack is usually between the leader and the person next to him who he has named as his opponent.

A player who dodges must come out of the circle. His opponent becomes the leader and launches a new attack against the next player in the circle.

When there is only one remaining player in the circle, he becomes the leader and the players form a new circle. The leader names the person to his left or right as his opponent in the upcoming assault.

In the event of a draw, the leader must attack the person on his other side (e.g. if the leader draws with the person to his left, he must attack the person to his right).

As soon as a player scores 5 points, he wins the tournament!

Always respect your opponent!
